Software engineer driven by a passion for learning and improving. Before I started this journey of software development I worked as a manager at a gas station. Although my beginnings were humble, my work ethic and will to learn will keep pushing me further.

Software Development Skills

JavaScript, React, Redux, Node.js, Express, RESTful API, PostgresQL, CSS, HTML, Git

Software Development Experience

DigitalCrafts, Atlanta, GA

Full Stack Development Immersive Student, April 2019 - August 2019
Software engineering training program covering full-stack development including, but not limited to JavaScript, Python, including an emphasis on cutting-edge frameworks like React/Redux and server-side technologies including Node.js, Express, and PostgreSQL.

Technical Projects

iFindFood
Restaurant finder application based on user's phone number.
- User inputs phone number that will then send a call to the WhitePages API which returns the users latitude and longitude, which will in turn send a request to the Google Places API and return information on all the restaurants within a 5 mile radius
- Built with HTML, CSS and JavaScript

Racket Builder
Comparison application that compares statistical values of custom-made ping pong paddles.
- Allows user to build custom rackets by choosing the blade and each rubber from any available provider, producing an expected output that the user can use to compare amongst custom rackets.
- Built with JavaScript, React and CSS

Additional Professional Experience

Iron Spirits, Cumming, GA

Productions Team, February 2017 - April 2019
Consulted with clients on logistics of desired custom furniture and props. I was also on the warehouse team that built-out and installed the furniture.

JR's Mart, Augusta, GA

Manager, July 2010 - January 2017
Managerial duties were to handle employee and customer disputes, set employee work schedules, order inventory and balance registers.
